

Graduate School of Engineering and Science, University of the Ryukyus

Resilient Smart City Program (Doctoral Program)

Non-Scholarship

About the Program

The “Resilient Smart City Program” aims to enhance human resources to play an active role in cities’ resilience and environmental issues. The program provides high quality courses dealing with resilience against serious disasters including those which are intensified by climate change.

Since the admission is in October and all the courses and student advising are in English, the program provides an excellent opportunity for international students.

This is a call for application to a three-year Doctoral Course for the academic years 2026-2029.

Upon enrollment, candidates will each be assigned to an advisor who will direct their thesis research for three years in their designated field of specialization. The degree of Doctor of Engineering / Philosophy will be awarded in recognition of thesis research and course work including seminars, with a minimum of 12 credits hours.

Before deciding the field and the topic of research, applicants are encouraged and recommended to contact appropriate advisor(s) listed in the List of Faculty Members.

Guidelines for Application (Fall 2026)

1. Number of Students to be Admitted

A few students.

2. Qualifications Required for Applicants

- (1) Prospective applicants are advised to contact potential thesis advisors at the University of the Ryukyus for consultation on research themes and plans; applicants without an advisor’s prior approval may not receive full consideration during the admission screening.
- (2) Nationality: Open to applicants of all nationalities
- (3) Education: Applicants must satisfy any one of the following conditions as of **September 30, 2026**.
